

How to make an Indoor Compost bin (Vermicompost)

Drill some holes into a used plastic tote. The worms need to breath.

Shred newspaper.

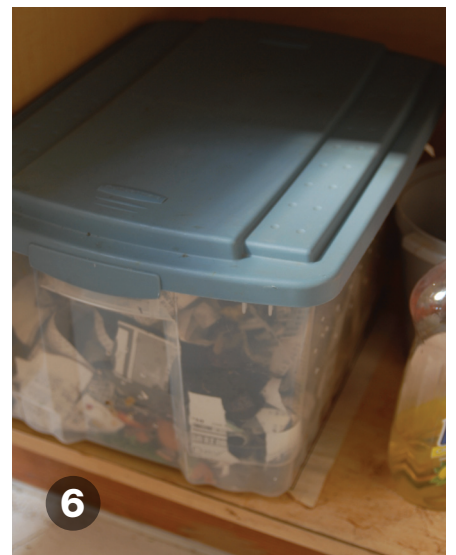

3. Add worms into it new home. They are red wigglers (*Eisenia Fetida*).

Add organic food scraps, but no meat and dairy products.

Add more newspaper or water to make the entire content moist but not flooded.

Store in a dark place. Worms love to work in dark environment.
